Work experience

[CSSSR](#)

Frontend developer, *October 2014 — current time*

Creating and supporting AngularJS applications.

[Yandex](#)

User interface developer, *April 2013 — October 2014*

Worked on promo pages, mostly on yandex browser promo page http://browser.yandex.ru/. Worked in full stack: I code client side html+css+js, and write backend business logic on NodeJS. Worked on marketing campaigns and AB-testing. Technology stack: NodeJS, Express, BEM, bh, priv.js, i-bem.

- http://browser.yandex.ru/ I implemented a lot of features, after they have successfully passed AB testing.
- http://browsers.yandex.ru/ Implementation of successfull redesign increase yandex browser conversation up to 10%.
- http://home.yandex.ru/

Volunteering for [FBK](#)

Full stack developer, *April 2014 – May 2014*

FBK Russia's largest anti-corruption fund. In the short time I have developed an anonymous online tool to safely send any data that would assist in the investigation of the fund.

Freelance

HTML Code, *Mostly 2009-2011*

Some time I worked as freelancer.

- http://migcredit.adonweb.ru/
- http://zubiki.adonweb.ru/
- http://en-i.ru/

My own projects:

- getbem.com — alternative for complicated bem.info
- frontender.info — participating in creating project, further support and translatings. It is a biggest online magazine for russian-speaking frontend developers.
- largescalejs.ru — Addy Osmany's book translation.
- bem-bootstrap — bootstrap blocks in BEM terms.
- gulp-csscomb-lint — tool for linting CSS files with CSScomb.
- CSS-Guidelines — Harry Roberts's CSS guidelines translation.
- Bochar — tool for generating Shower presentation from Markdown files
- jquery.imenu — jQuery plugin to control state of menu at responsive sites.
